Round Channelizer Post Added to Davidson's Reliable Offering of Channelizer Posts

Tacoma, WA - Davidson Traffic Control Products is rounding out their offering of reliable channelizer posts with the introduction of the DP 200. The DP 200 is a 3 inch round polyurethane channelizer post that provides 360 degrees of reflectivity visibility.

Davidson is known for their innovative clover leaf shaped channelizer posts and the round DP 200 is something new. Peter Speer, VP of Sales at Davidson commented that the DP 200 was a request from various customers who have grown to rely on Davidson's quality channelizer posts but desired a round post with full 360-degree visibility.

The DP 200 is constructed of highly durable thermoplastic polyurethane that provides enhanced strength and durability. There are no metal parts to rust or seize which decreases maintenance time and replacement costs. The DP 200 is safer than heavier steel posts that often shear off after being struck. Like all the channelizer posts in the Davidson, line the DP 200 is sturdy and rebounds after being struck and installation is a snap.

Davidson Traffic Control Products is part of Pexco LLC, a global manufacturer of various plastic products with the advantage of years of technical and engineering expertise. Davidson Traffic Control Products manufacture a unique family of Type I, II & III Barricades, Channelizer Posts, Curb System, Work Zone Pavement Markers, Flexible Delineator Posts, Reflectors for Barrier Walls and Guardrails, Snow Poles and many adhesive products that have gained worldwide acceptance.
