

Davidson Traffic Control Products

Options and Applications for T1B & T2B Barricades

Type I & II Barricade Products

Un-matched in Durability

Type I & II barricades from Davidson provide the perfect long-lasting solution to your traffic control needs. These barricades meet both the standards of NCHRP 350 as well as MUTCD Section 6F.63 for Type I & II barricades. The T1B & T2B readily yield when struck, allowing a vehicle to hit these devices without causing damage to the passenger compartment.

The specially engineered plastics we use to build our barricades allow the T1B & T2B to withstand impacts where other plastic or wooden barricades simply break and splinter. Our T1B & T2B offer superior durability, reliable results, and a longer life cycle providing a greater return on your investment.

We are the only manufacturer to offer a 3-year pro-rated warranty on the entire range of our Type I, II & III barricade panels, giving you the confidence that barricade products from Davidson are the best choice for your projects.

Designed for Low Maintenance
Our T1B & T2B barricades are very low maintenance. Durable plastic construction means no more

4", 6", 8", & 12 x 24" wide panels available

splinters. Purchasing the T1B or T2B reduces your costs associated with breakage. Our barricades stack easily. They are lightweight, easy to use, and service.

Poly-Kade Barricades Feature:

- 4, 6, 8 and 12 x 24 inch wide panels with a **3-year pro-rated warranty** against breakage
- Top side of panels have smooth surface to allow easy application of reflective tape
- All components interchangeable and sold as complete units or separate parts
- The only panels that are **impact tested** to ensure durability in the field
- Impact-resistant and UV-stable thermo-plastics for superior durability
- Panels and legs available for purchase separately for replacements
- Pre-molded holes squared off to accept standard carriage bolts
- Folds and stacks flat (folded dimensions: 2 x 24 x 45 inches)
- Complete barricades assembled with 1/4" zinc-coated hardware

Options and Applications for T1B & T2B Barricades

Parade-Style Barricade Products

Parade Style O-Frame Barricades

Our O-Frame barricades have many uses in low-speed municipal applications including plank box utility closures, crowd control and parking control for parades and public events. When you need a system to cordon off large areas, our Parade-style O-Frames offer a convenient and durable choice. Our legs are designed with two slots to hold one or two of our plastic panels, or traditional wooden boards. We are the only manufacturer to offer a 3-year pro-rated warranty on our plastic barricade boards. The panel that supports the most valuable portion of the barricade – the reflective sheeting – will not break, splinter, rot, rust, crack or peel. And our NCHRP 350 approval assures you of our quality and integrity!

4 or 6" Left

4 or 6" Right

Barricades with 3M™ Scotchlite™ High Intensity Work Zone Sheeting offer high performance reflectivity in the work zone. They are highly visible at night, even when placed at wide viewing angles to approaching traffic. They are durable and remain visible throughout their life cycle, providing an extra safety factor for drivers who depend on them for guidance.

ADA style O-Frame Barricade w/1 x 8" Plastic Panels

MUTCD style O-Frame Barricade w/2 x 8" Plastic Panels

Our Parade Style O-Frame Barricades Feature:

- **3-year pro-rated warranty** against breakage!
- Parade panels have smooth surfaces to allow easy application of reflective tape
- Barricade panels available in 4, 6, 8, 10 and 12-foot standard lengths
- Flexibility to convert to a Type 1 or Type 2 using the same components
- Impact-resistant and UV-stable thermo-plastics for superior durability
- Rigid barricade legs will not sag or collapse in the heat of the sun
- Injection-molded, barricade legs stack for easy transit
- Barricade legs with built-in holes for attachment of lights
- Panels & legs available for purchase separately or together
- Engineered to conform to NCHRP 350 & MUTCD
- Choose from Engineer, High Intensity or Prismatic sheeting
