Plastic Type III Barricade Products

T3B Plastic Type III Barricade

## Ease of Use

The T3B barricade takes up about half as much space in transport as a plastic drum, and sets up in just seconds. One person is all that is required for a complete set up or tear down. Used with our plastic A-frame legs, our T3B panels can also be used to construct Type I or Type II A-frame barricades, for use in many low-speed municipal applications, including plank box utility closures, or crowd and parking control for parades and public events. The panels may also be used for the reflective top or bottom panels on traditional metal-leg Type I & II barricades.

## Superior Visibility

The T3B polycomb panel is over 8 inches wide, accommodating either 7 3/4 or 8-inch wide sheeting. The flat panels make sheeting application as easy as striping wood boards, but without the hassle of painting. The factory-applied reflective sheeting provides clear directions to passing motorists. Choose from any type of reflective sheeting in order to meet your local specifications.

**Type I Engineering Grade**  
**Type III High Intensity**  
**Type IV Prismatic High Intensity**  
**Type XI Super High Prismatic**

Choosing factory-applied sheeting provides for a ready-to-use barricade shipped straight to your job site, speeding up the pace of your project.

Barricades with stripes beginning at the upper right side and sloping downward to the lower left side are

to designated as right (R) barricades.

Right barricades are placed on the right side of the road and are designed to move traffic to the left. Barricade stripes beginning at the upper left side and sloping downward to the right side are to be designated as left (L) barricades. Left barricades are placed on the left side of the road and are designed to move traffic to the right. Barricade sheeting has alternating 6 orange and white or red and white stripes running diagonally across the sheeting at an angle of 45°.

## Durability

By using durable high density polyethylene plastic panels and a modular design, the T3B system can take a high speed impact with minimal damage and a quick return to service. The easily interchangeable parts speed repair of damaged units and shortens turnaround time.

## Plastic Type III barricade products

T3B 1 X 8" PANEL

### Type III Barricades Have Many Options & a 3-Year Warranty

- Specially designed plastic panels eliminate time consuming cutting and painting and will not break.
- The panels are virtually shatterproof ensuring a long working life and a high return on your investment.
- Few parts to assemble; lightweight and easy to handle.

### Type III Barricade Options

#### Upright options:

- X-Tube lightweight square reinforced upright.
  - 1.75" PSST upright.
  - 3.5" square poly-tube.
- #### Barricade feet options:
- 5' Angle Iron Powder Coated White feet.
  - 5' galvanized 2" PSST feet.

- "The Yeti" 40# recycled rubber feet
- Hardware options: Standard hardware (bolts, washers & lock nuts).
- Ant-theft hardware.
- Quick release pin.

### 1 x 8 T3B Type III Barricade Panel

- The T3B panel from Davidson is the only panel in the industry to carry a 3-year limited warranty covering breaking and adhesion of reflective sheeting.
- 8-1/4" wide flat panels make application of reflective sheeting simple and fast.
- Factory-treated panels create a reliable bond for reflective sheeting.
- Seven internal I-beams create a rigid yet lightweight structure.

### Complete System

A complete T3B Type III Plastic Barricade includes the following materials:

- 3 each T3B polycomb panels, available in 4,6,8,10, or 12 foot lengths;
- 2 each X-tube 1.75" square plastic uprights, available in 5 or 6-foot lengths;
- 2 each 2" 14 ga. PSST barricade feet with 6" welded upright;
- 12 each bolts and nylock nuts (to attach panels to the X-tube uprights);
- 2 each Quick-release pins (to attach X-tubes to barricade feet);

*All T3B products are both Recycled and Recyclable*
