# Available Options and Instructions for T3B™ Barricade

Plastic Type III Barricade Products

### Superior Visibility

The **T3B** polycomb panel is over 8 inches wide, accommodating either 7 3/4 or 8-inch wide sheeting. The flat panels make sheeting application as easy as striping wood boards, but without the hassle of painting. The factory-applied reflective sheeting provides clear directions to passing motorists. Choose from any type of reflective sheeting in order to meet your local specifications.

- Type 1 Engineering Grade**
- Type 2 Super Engineering Grade**
- Type 3 High Intensity Grade**
- Type 7 Prismatic HI (LDP DG)**
- Type 8 Prismatic HI (8200 series)**
- Type 9 Prismatic HI (VIP DG)**

Choosing factory-applied sheeting provides for a ready -to-use barricade shipped straight to your job site, speeding up the pace of your project.

Barricades with stripes beginning at the upper right side and sloping downward to the lower left side are to designated as right (R) barricades. Right barricades are placed on the right side of the road and are designed to move traffic to the left. Barricade stripes beginning at the upper left side and slopping downward to the right side are to be designated as left (L) barricades. Left barricades are placed on the left side of the road and are designed to move traffic to the right. Barricade sheeting has alternating 6" orange and white or red and white stripes running diagonally across the sheeting at an angle of 45°.

### Sheeting Options

### Durability

By using durable high density polyethylene plastic panels and a modular design, the T3B system can take a high speed impact with minimal damage and a quick return to service. The easily interchangeable parts speed repair of damaged units and shortens turnaround time.

### T3B Plastic Type III Barricade

#### Ease of Use

The **T3B** barricade takes up about half as much space in transport as a plastic drum, and sets up in just seconds. One person is all that is required for a complete set up or tear down. Used with our plastic A-frame legs, our T3B panels can be used to construct Type I or Type II A-frame barricades, for use in many low-speed municipal applications, including plank box utility closures, or crowd and parking control for parades and public events. The panels may also be used for the reflective top or bottom panels on traditional metal-leg Type I & II barricades.
